

Piedmont Environmental Alliance Inc

Environmental Education Expansion: Piedmont Environmental Alliance Inc is expanding their environmental education programming across Forsyth County with a 2024 Ribbon of Hope grant. This initiative aims to reach more students and enhance their understanding of environmental issues.

The science, technology, engineering, and math (STEM) programming will impact students from kindergarten to twelfth grade, providing them with valuable knowledge and skills in these areas. The program is expected to serve several thousand students during the year, significantly increasing student engagement and participation in environmental education.
