## Jim Bernstein Community Health Leadership Fellows Program

The Bernstein Fellows Program prepares emerging leaders to work in and improve the health of rural and under served communities in North Carolina. The previous 23 Fellows include: public health professionals, health educators, nutritionists, social workers, primary care providers, and administrators. The two-year fellowships are designed with educational and project development components.

The grant supports adding three Fellows to each of its next two fellowship classes. The additional three Fellows will be “NC GlaxoSmithKline Foundation Fellows Cohort” and will increase the Fellows from the current five to eight per fellowship term. This will provide a total of six “NC GlaxoSmithKline Fellows” in the program from October 2017 – September 2021.

The Traditional grant for \$90,000 supporting this program will run 2017-2021.
